The eSkills4All e-platform is ready!!

eSkills4All aims to train and empower adults who have a low level of digital skills to bridge the gap between digital illiteracy and the demands of the labour market. We're fighting back against skills mismatches and unemployment, not just in the technology sector, but also any industry in which digital skills can help individuals exceed, progress and succeed!

As part of this aim, we are now offering practical tools to support adults in either re-entering the labour market or improving their current digital skills, to provide further opportunities in their current role.

Our curriculum consists of five modules, each covering 3 topics, addressing various aspects of the digital world. The training course is compliant with ECVET learning outcomes.

The modules we have produced are:

1. Problem Solving
2. Digital Content Creation
3. Communication and collaboration
4. Safety
5. Information and data literacy

We have delivered these modules through a hands-on, personalised, online training tool, where learners can access the modules, assess their digital competence through our quizzes, improve their knowledge and gain recognition of their skills with Open Badges!

Our interactive e-platform also provides a forum for communication, a support hub and an e-employment data bank!

The Tool is available in English, Greek, Romanian and French.

We would love you to try our online tool and let us know what you think. We also provide a live chat facility that you can use on our website if you have any questions.

Module 1 - Problem Solving

- **Self Assessment for Module 1 - Problem Solving**
  - ❶ 4 of 8 Attempted
- **Content for Module 1 - Problem Solving**
- **Module 1 Quiz**
  - ❶ 7 of 8 Attempted
- Practical Assignments for Module 1

  Restricted Not available unless: The activity Module 1 Quiz is complete and passed

We are planning out Learner, Teacher, Trainer event this August!

An LTTA is a training week, where all of the consortium trains those that will be the advocated trainers for eSkills4All after the project ends. We want to make sure the tool will be used for years to come all across Europe!

Our LTTA will provide 3 days of intense training covering:

- Intense sessions explaining the meaning behind the content
- The best way to train participants on this content
- The Academy
- The ToolKit

The Toolkit is currently under development and will be ready by the end of August 2019.

It will be an Up-skilling Handbook (on line and hard copy) for the target group and the organisers (partner organisations), which will give guidelines for the implementation programme in each country and the services provided by the SUPPORT HUBS.

If you require any further information, this can be found on our project website www.eskills4all.eu. Please get in touch with us via the website or on social media if you are interested in this project.
